Executive Snapshot

Indicators calculated from the figures reported in this assessment.

Opportunity Score 100/100 Relative size of the estimated monthly opportunity (operational inefficiency plus revenue loss); 100 corresponds to \$20,000 or more per month.	Estimated Revenue Leakage \$18,150 Monthly revenue loss you reported, adjusted for the priority level you selected.	Operational Drag \$3,305 Estimated from your reported costs: 20% of software and marketing spend plus 35% of administrative cost (planning assumptions).

Executive Summary

This Executive Diagnostic Report summarizes the information you provided about your Service Business business. It highlights operational areas where improvements could reduce costs, accelerate revenue cycles, and free team capacity, and it proposes a phased implementation that starts with the areas of highest expected impact. Figures in this report are calculated from the amounts you reported; timelines and results are planning estimates to be validated with you and are not guaranteed.

Current Operational Challenges

The challenges below are summarized from your own description of current operations and will be validated with you during the executive review.

- Lead Intake: "Google, Referrals, Property managers, Emergency calls, Repeat customers - inconsistent handling."
- Estimates & Quotes: "Manual estimates with delays."
- Scheduling & Operations: "Manual dispatch and coordination causing chaos."
- Admin & Communication: "Manual follow-up and coordination."
- Existing Systems & Spend: "Partial software use costing \$1,200/month."
- Marketing & Lead Sources: "Various lead sources with potential for optimization."
- Revenue Leakage Indicators: "Revenue leakage from lead loss and inefficiencies."
- Decision Maker Insight: "Decision making by owner and general manager."

Hidden Revenue Risks

Amounts shown are calculated from the figures you reported. The remaining items are risks commonly associated with manual processes; they are listed for validation, not as measured findings.

- Estimated operational inefficiency: \$3,305/month, calculated from your reported software, marketing, and administrative costs using planning assumptions (20% of software and marketing spend, 35% of administrative cost)
- Estimated revenue loss: \$18,150/month, based on the monthly revenue loss you reported and adjusted for the priority level you selected
- Potential risk to validate: inconsistent processes can reduce team capacity for strategic work and client relationships
- Potential risk to validate: manual administrative work can divert leadership time away from growth
- Potential risk to validate: longer sales cycles can affect cash flow and predictability

Current State vs Desired State

Current and desired states as described in your assessment.

Dimension	Current	Desired
Lead Intake	Google, Referrals, Property managers, Emergency calls, Repeat customers - inconsistent ha...	Consistent lead intake with immediate response and assignment.
Estimates & Quotes	Manual estimates with delays.	Quick and accurate quoting process.
Scheduling & Operations	Manual dispatch and coordination causing chaos.	Automated scheduling and dispatch.
Admin & Communication	Manual follow-up and coordination.	Automated administrative processes.
Existing Systems & Spend	Partial software use costing \$1,200/month.	Full integrated system for better operations.
Marketing & Lead Sources	Various lead sources with potential for optimization.	Optimized marketing for consistent high-quality leads.
Revenue Leakage Indicators	Revenue leakage from lead loss and inefficiencies.	Minimized leakage through improved processes.
Decision Maker Insight	Decision making by owner and general manager.	Defined decision-making process.

Recommended Solution Strategy

We recommend a phased approach that starts with the areas of highest expected impact, confirmed with you during scoping. The priorities below describe the proposed approach, not results already achieved.

- Standardize lead intake so new inquiries are captured, qualified, and assigned consistently
- Streamline quote preparation to shorten turnaround, with a target agreed during planning
- Improve scheduling workflows to reduce conflicts and administrative overhead
- Automate routine follow-ups to support consistent client communication
- Establish an operational dashboard for ongoing performance visibility

Implementation Roadmap

The proposed implementation is organized in three phases. Durations are indicative planning estimates and are confirmed during scoping.

- 1. Phase 1 — Foundation (indicative weeks 1–2): operational review, workflow design, system setup, and team alignment**
- 2. Phase 2 — Implementation (indicative weeks 3–6): lead intake, quoting, and scheduling improvements; team training**
- 3. Phase 3 — Optimization (indicative weeks 7–12): performance tracking, refinement, and sustainability planning**

ROI & Business Impact

The amounts below are calculated from the figures you reported. They size the opportunity; they are not a forecast of guaranteed returns. Actual results depend on scope, adoption, and execution.

- Estimated monthly operational inefficiency the engagement would address: \$3,305
- Estimated monthly revenue loss the engagement would address: \$18,150
- Estimated annual exposure of \$257,460 compared with a recommended engagement investment of \$21,700
- Leadership time savings and payback period are not measured by this assessment; any estimate is prepared with you during the executive review and is not guaranteed

Investment Proposal

We recommend a focused engagement to address the operational and revenue issues described in your assessment. The engagement includes discovery, strategic planning, implementation support, and 90 days of advisory guidance.

- Engagement Investment: \$21,700 (includes discovery, implementation, and 90-day advisory support)
- Setup & Implementation: \$10,850 upfront for setup and implementation of the agreed scope
- Monthly Advisory Support: \$2,604/month (optional)

Why This Investment Makes Sense

This engagement is designed around the issues described in your assessment and the amounts you reported. It is intended to strengthen lead conversion, margin, and operational predictability; specific results are validated during the engagement.

- Findings in this proposal are based on the information you provided
- The roadmap is organized in three phases with an indicative 12-week plan confirmed during scoping
- The proposed investment can be weighed against the monthly costs and revenue loss you reported
- Optional ongoing advisory support helps sustain improvements after implementation

Next Steps

This proposal outlines a clear path forward. The next step is your decision and our kickoff planning.

- Review this proposal with your leadership team
- Approve the recommended scope and timeline
- Schedule our project kickoff within the next 5 business days

Investment Summary

Estimated Annual Business Exposure

\$257,460

Estimated monthly revenue loss plus operational inefficiency, multiplied by 12, based on the figures reported in this assessment. The engagement below is intended to reduce this exposure; the amount and timing of any recovery are not guaranteed and are validated during scoping.

The following investment reflects the scope of the areas documented in this assessment.

Engagement Investment

\$21,700

Includes discovery, strategic planning, implementation support, and 90 days of advisory guidance.

Investment Breakdown

Setup & Implementation Setup and implementation of the agreed scope	\$10,850
Monthly Advisory (Optional) Ongoing strategic guidance and performance review	\$2,604

What Happens Next

This proposal is ready for your review and decision. We are prepared to move forward with implementation upon your approval.

- 1 Review this proposal with your leadership team
- 2 Confirm your decision within the next 48 hours
- 3 We schedule your implementation kickoff immediately
- 4 Begin operational transformation this week
